Title: Wisconsin DNR Fire Protection Areas

Geospatial_Data_Presentation_Form: vector digital data Online_Linkage: http://dnr.wi.gov/org/land/forestry/GIS/

Description:

Abstract:

Areas designated in an effort to divide the responsibility of fire suppression within the state. The intensive and extensive areas are at a higher natural risk for fires and the DNR has the statutory responsibility for fire suppression. The distinctions between intensive and extensive areas are defined in Administrative code (NR30).

Source_Scale_Denominator: 1:100,000

Process_Step:

Process_Description:

Protection Areas are derived from the Fire Response Unit (FRU) layer. Multiple FRUs are contained within each Protection Area.

Process_Step:

Process_Description:

Updated boundaries 1. moved city of Mosinee, Village of Kronenwetter, and Village of Rothschild to cooperative protection 2. adjusted so Rib Mountain is entirely within protection 3. adjusted so southern piece of WI Dells FRU is in extensive protection as opposed to intensive
